GEO. COOLING & SONS,

Seed Merchants and Nurserymen.

January 1915.

WE beg to hand you our GARDEN, FLOWER SEED, AND SEED POTATO CATALOGUE FOR 1915.

The disastrous War now prevailing in Europe has seriously interfered with the usual deliveries during the Autumn, and there cannot be a doubt but that there will be a shortage of some kinds of Seeds in the coming Spring.

As this is a period when it is most necessary that all available land in our country should be well stocked we have been more than careful in our trials and selections, and, with an experience of more than half-a-century in the Seed Trade which we can place at the disposal of our Customers, we feel assured we are in a position to offer stocks which are second to none in our trade, and at prices that will compare with any reputable house.

Throughout our List we offer many Specialities of our own raising. These are the results of years of careful selections, and are worthy of attention in making out the Seed order.

We also ask to call attention to our stocks of SEED POTATOES. These have been grown in the most favoured districts in Scotland and Lincolnshire expressly for seed purposes, and we are sure will give good results (pages 16-17).

Assuring you of our most careful attention to your orders,

We are,

Yours obediently,

GEO. COOLING & SONS.

VEGETABLE SEEDS.

Garden Peas.

CULTIVATION.—Peas do well in any good garden soil, but thrive best in ground deeply trenched and manured for a previous crop. Sow about an inch and a-half deep in double rows 6 or 8 inches apart, with bush stuck in between the rows for support. It is also a good plan to sow in trenches wide apart, with some other crop between; by this means both sides of the rows get the full advantage of light and air, while the trenches are convenient for watering in dry seasons. For an early crop a sowing of the *Earliest* varieties may be made in January—they are hardy, and frost will not harm them. Sowings of *Second Early* varieties may be made in February, and the main crops in succession from March to the end of May. Peas should be gathered as fast as they become fit for use.

Earliest Varieties.

	Per quart—s. d.		Per quart—s. d.
COOLING'S FIRST EARLY. We can with confidence recommend this variety as being the hardiest, most prolific, and best early round Pea in cultivation. The pods are of large size, mostly in pairs, well filled and of finest quality	2 0	PETER PAN , a tremendous cropper, producing long dark green pods filled with peas of exquisite flavour, a favourite dwarf early Pea, 1½ ft., per pint pkt. 1/6	
COOLING'S EARLY MARKET , an early wrinkled Pea, which quickly follows the preceding variety. It is hardy and very productive; highly recommended 1½ ft.	2 0	PRIMO. The distinctive merits of this grand Pea are its extreme earliness, combined with exceptional quality; pods as large as <i>Gradus</i> , very hardy and absolutely fixed in character, 3 ft., per pint pkt. 1/6	
BRITISH LION , a very large new fine early Pea, very hardy, may be sown in autumn and early spring, dark green pods, slightly curved and pointed, well filled 3 ft., per pint 1/9		KING EDWARD VII , a splendid second early dwarf wrinkled Pea of very robust growth, with very large broad pods, a most prolific cropper 1½ ft.	2 0
CHELSEA GEM , an early wrinkled variety of superior quality 1 ft.	1 6	THE PILOT , described as the earliest of all round seeded varieties. It is of the well known <i>Gradus</i> type, but of much more hardy constitution, and may be sown very early, 3 ft.	2 6
GRADUS , a large podded first early wrinkled marrow of great merit; produces deep green coloured pods which are as large and well filled as <i>Duke of Albany</i> 3 ft.	1 6	THOMAS LAXTON , large podded first early wrinkled marrow, rich dark green colour, excellent flavour 3 ft.	1 6
LAXTON'S SUPERB , a very early dwarf Pea, semi-wrinkled, the pods double the size of <i>Pilot</i> and borne in great profusion. The raisers consider it the finest early semi dwarf Pea yet raised. Award of Merit Royal Horticultural Society 2½ ft., per ½ pint 1/6		THE SHERWOOD , described as one of the best dwarf Peas, the haulm is literally covered with pods containing 8 to 10 large peas of a rich deep colour and exquisite flavour ... 1 ft.	1 6
MARVELLOUS , new dwarf early wrinkled marrow of sturdy habit, enormous cropper, pods of large size produced in pairs containing 8 to 10 luscious peas of exquisite flavour, 1½ ft., pint packet 1/6		WILLIAM THE FIRST , a fine early tall Pea, green marrow, combining flavour, earliness, and productiveness with appearance ... 3½ ft.	1 0

Second Early Varieties.

	Per quart—s. d.		Per quart—s. d.
COOLING'S RELIABLE , an exceedingly prolific second early variety which has given great satisfaction to all who have grown it; it produces an immense crop of well-filled pods of unsurpassed quality, far in advance in flavour and appearance to the ordinary second early kinds 4 ft.	2 0	DUKE OF YORK , an earlier and dwarfer form of <i>Duke of Albany</i> , possessing all the good qualities of that standard variety; highly recommended 3½ ft.	2 0
CARTER'S DAISY , a dwarf wrinkled marrow bearing large well-filled pods 2 ft.	1 4	PRIZEWINNER (SUTTON) , an excellent second early variety, handsome large slightly curved pods with fine peas of delicious flavour 3 ft.	2 0
PRINCE OF WALES 3 ft.	1 0	SENATOR , good and reliable second early variety, in the way of <i>Prince of Wales</i> , recommended 3 ft.	1 6

Coolings' First Early—The best Pea for first sowing.

PEAS—For Medium and Late Crops.

	Per quart—s. d.		Per quart—s. d.
COOLING'S VICTOR , one of the finest Dwarf Peas for main crop; it is deep green in colour, an immense cropper, and of high quality, 2½ ft.	2 0	MAGNUM BONUM , a very excellent marrow-fat variety, and fine for exhibition purposes; it resists mildew, and the pods are of the finest form and colour 3 ft.	1 6
ALDERMAN , a grand variety for exhibition; it produces very large handsome deep green pods, well filled, many containing 12 large peas of richest flavour; highly recommended 5 ft.	2 0	MASTERPIECE , a very excellent pea, producing pods of immense size, wonderfully filled, deep-green in colour, grand for exhibition, 4 ft.	2 0
AUTOORAT , a large blue marrow Pea with dark foliage and pods; one of the best varieties for successional sowings, as it is so free from Mildew even in dry seasons ... 4 ft.	1 4	QUITE CONTENT , exceedingly prolific, large well-filled pods mostly in pairs; a grand exhibition variety 6 ft.	2 6
DUKE OF ALBANY , a splendid wrinkled variety for main crop; it is immensely productive, with handsome dark green pods, 5 ft.	1 6	STRATAGEM , one of the best main crop varieties, of good quality and an extraordinary cropper 2½ ft.	1 4
DWARF DEFIANCE , a heavy cropping variety, with long straight pods closely packed with large peas of splendid flavour 2½ ft.	1 4	THE QUEEN , an excellent dwarf variety, a blue wrinkled marrow of sturdy branching habit 3 ft.	1 6

Latest Varieties—For late Summer and Autumn Crops.

	Per quart—s. d.		Per quart—s. d.
COOLING'S LATEST OF ALL , an ideal variety for latest sowings; it is of robust habit, deep green foliage, and absolutely free from mildew, the greatest pest of late peas; it is of excellent quality, being of highest marrow-fat flavour 3½ ft.	2 0	CAPTAIN CUTTLE , a distinct and valuable late variety, large and handsome deep green pods of excellent quality 3½ ft.	2 0
HURST'S PASSPORT . Best described as a dwarf <i>Alderman</i> , the pods being equally large and shapely and excellent for exhibition ... 2 6	2 6	MATCHLESS MARROWFAT , an excellent late Pea, most suitable for exhibition, of robust growth, and free from mildew ... 3½ ft.	2 0
BRITISH QUEEN, OR WARD'S INCOMPARABLE , one of the most productive and excellent of all the tall marrow Peas, flavour very superior 6 ft.	1 4	NE PLUS ULTRA , a fine dark green wrinkled marrow, an abundant bearer, of superior flavour, remaining a long time fit for use, 6 ft.	1 4
		THE GLADSTONE , a splendid maincrop variety, large dark green pods well filled, fine flavour; excellent for exhibition ... 3½ ft.	1 4

Broad Beans.

CULTIVATION.—For an early crop sow in October or November; the main crop should be sown in February, others may follow up to the end of April. Sow in rows 2 feet wide, with the seed 3 inches apart in the rows.

	Per quart—s. d.		Per quart—s. d.
COOLING'S IMPROVED WHITE WINDSOR . This is the finest variety of Broad Bean in cultivation, the pods grow to a large size, are very broad and long; it can be recommended as an Exhibition variety, and is undoubtedly the best for main crop 1 6	1 6	BUNYARD'S EXHIBITION LONG-POD , selected stock, finest and most productive long-pod Bean yet offered; stems covered with handsome pods, containing 7 and even 8 beans; strongly recommended 0 10	0 10
COOLING'S IMPROVED GREEN WINDSOR . A great improvement upon the ordinary <i>Green Windsor</i> , both in size of pod, productiveness, and colour; for home use the superior flavour of all the green beans over the white varieties is generally acknowledged, and this variety, on account of its mellow and delicious flavour, has become a universal favourite 1 6	1 6	AQUADULCE , the longest pod of all, fine for exhibition 1 0	1 0
GIANT SEVILLE LONG-POD , produces extraordinary long pods; being of branching habit should have plenty room 1 0	1 0	BECK'S GREEN GEM , dwarf, mild flavour .. 1 0	1 0

		JOHNSON'S WONDERFUL , productive, and of good flavour 0 8	0 8
		TAYLOR'S BROAD WINDSOR , an excellent broad podded variety 0 8	0 8

Cooling's Improved White and Green Windsor are the best types of Broad Beans in cultivation.

Runner Beans.

SCARLET EMPEROR , a giant amongst Scarlet Runner Beans, producing pods 15 inches long; grand exhibition variety, ½-pt. pkt. 1/-	Pt. Ql. s. d. s. d.
BEST OF ALL , handsome pods, free from coarseness, and of excellent quality, in- valuable for exhibition	1 9 3 0
CHAMPION SCARLET , improved variety of old Scarlet Runner, with longer pods	1 4 2 6
THE CZAR , a white seeded variety with pods of gigantic dimensions, very thick and fleshy, an enormous cropper ...	1 4 2 6
SCARLET , well-known and productive variety, good for general crop ...	1 2 2 0

NE PLUS ULTRA , exceedingly fine for main crop, long and handsome pods of superior quality	Pt. Ql. s. d. s. d.
PAINTED LADY or YORK AND LAN- CASTER , popular old variety, with pretty scarlet and white flowers ...	1 9 3 0
VEITCH'S CLIMBING FRENCH BEAN , it is much earlier than the Runner, has all the delicate flavour and quality of the Dwarf Bean	1 4 2 6
WHITE SEEDED RUNNER , a favourite variety with market growers, as the pods keep a bright green instead of turning brown as they grow old	1 2 2 0

French or Kidney Beans.

CULTIVATION.—The Dwarf varieties may be sown from the middle of April to the end of July in rows 2 feet apart; if dry weather sets in water copiously. The most suitable time for sowing the tall varieties is during the month of May, in rows 4 feet wide, and the seed 2 inches deep.

Dwarf Varieties.

COOLING'S "NE PLUS ULTRA." Selected stock. This variety has now established it- self as the earliest and most productive Dwarf Bean in cultivation; it is unequalled for forc- ing or first sowing out of doors, being at least ten days earlier than <i>Osborn's</i> and other well-known early kinds. This fine Dwarf Bean has been awarded more Certificates of Merit by the Royal Horticultural Society after the Chiswick trials than any other variety	Per quart—s. d. 2 0
EXCELSIOR , splendid new variety, bearing a wonderful crop of very long straight fleshy pods measur- ing 8 inches in length, of finest table quality, a very handsome exhibition variety. Award of Merit R.H.S.	per pint packet 2/6

EVERBEARING , dwarf, robust and bushy, should be allowed plenty of room for growth; the pods are dark green in colour and de- licious in flavour; marvellously productive and extremely early	per quart—s. d. 2 0
CANADIAN WONDER , heavy cropper, pods 9 to 12 inches, an abundant bearer and tender	1 0
NEGRO LONG-PODDED , one of the best for general crop	1 0
OSBORN'S FORCING , prolific, fine for forcing	1 6
SION HOUSE , fine for forcing	1 4
SUTTON'S SUPERLATIVE , an abundant cropper, producing exceptionally fine pods, very compact in growth and dark green foliage	per pint packet 1/6

Butter Beans or Golden Wax Pod.

This class is much esteemed and largely grown on the Continent and in America. They have a mild and creamy flavour, the pods are of a rich golden yellow colour, which gives them the appearance of a new vegetable, and in being stringless they present the advantage of being readily cooked whole if desired.

MONT D'OR OR GOLDEN WAX , very early and productive, golden yellow stringless pods; height 6 ft.	Per pint—s. d. 2 0
GOLDEN BUTTER , very early, dwarf, thick pods of bright yellow colour, 2 ft.	Per pint—d 1 6
WAX DATE , dwarf, yellow, long podded, stringless, excellent for forcing, 2 ft.	1 6

Asparagus.

CULTIVATION.—The seed should be sown in March and April, in rows two feet apart. In selecting a spot for an Asparagus Bed choose an open and sunny situation; as this is a crop which will occupy the same spot for several years a little trouble expended upon it in the first place will well repay itself. The soil should be trenched at least to the depth of two feet, and plenty of good rotten manure mixed with it from top to bottom. The beds may be four feet wide, with two feet alleys between; three rows should be planted in each bed, one in the centre and one on each side at the distance of a foot; the roots about nine inches apart in the rows. A dressing of salt or asparagus manure in autumn or early spring at the rate of about four pounds to every six square yards is very beneficial.

CONNOVER'S COLOSSAL , an American variety, grows to an immense size, and is fit to cut two years after sowing	Per oz.—s. d. 0 6
GIANT , the ordinary kind	0 4
GIANT ARGENTEUIL , early purple, as grown by the celebrated French growers for Paris market	Per oz.—s. d. 0 6

For ASPARAGUS PLANTS, see *Culinary Roots*, page 16.

Cooling's "Ne Plus Ultra" Dwarf Bean should be included in every seed order.

Beet.

CULTIVATION.—Sow end of April and in May in drills a foot apart and half-an-inch deep; thin out the plants when up to 12 inches apart. A rich deep open soil is the most suitable for Beet.

	Per oz.—s. d.		Per oz.—s. d.
COOLING'S OMEGA , this highly esteemed variety is of medium size, and remarkable for handsome shape and rich crimson colour, but more especially so for its distinct flavour, which is delicately sweet and agreeable, far surpassing any kind yet offered. This variety is the original green-leaved Beet which has now become so popular with private and market growers in all parts of the country		CRIMSON GLOBE , perfect in shape and colour, recommended for shallow soils and earliness	1 0
per pkt. 6d.	1 6	NUTTING'S FINE SELECTED DWARF , dark red, fine	0 8
VEITCH'S SUPERB RED , finely formed, bright rich colour, and high quality. The foliage being beautifully coloured it is as valuable for decorative as for table use ...	1 0	CHELTENHAM GREEN TOP	1 0
DELL'S IMPROVED BLACK LEAVED , the best for flower garden decoration ...	1 0	BLOOD RED	0 8
EGYPTIAN TURNIP ROOTED , like a Dutch Turnip	0 10	ORNAMENTAL CHILIAN , much admired for its foliage in garden decoration	
		per pkt. 6d. and 1/	

Edible Leaved Varieties.

WHITE OR SPINACH , an excellent substitute for Spinach	0 6
SILVER OR SEA-KALE , the mid-rib of the leaf cooked like Sea-Kale is excellent	0 8

Broccoli.

CULTIVATION.—Succeeds best in a substantial loamy soil. Frequent sowings are necessary during March, April, and May if a succession is required. The first crop should be got out as early as possible in June to get well established before very dry weather begins. Plant out in rows two feet apart.

For Autumn and Winter Use.

	Per oz.—s. d.		Per oz.—s. d.
COOLING'S FIRST EARLY , a really choice first early White Broccoli, forming close firm white heads of very fine quality, which come into use between <i>Snow's Winter</i> and the early Cornish sorts	2 6	VEITCH'S SELF-PROTECTING , robust and upright growth, firm large and compact heads, thoroughly protected, extremely valuable, as it succeeds the Autumn Cauliflower	1 6
SNOW'S SUPERB WINTER WHITE , we offer a very fine stock of this, which, when obtained true, is perhaps the finest of all Broccoli for Winter cultivation per pkt. 1/	2 0	WALCHEREN , best for successive sowings	
		per pkt. 6d.	1 6

For Spring Use.

COOLING'S MATCHLESS , although this variety has been before the gardening world for more than twenty years, yet it still holds its position as the finest mid-season Broccoli in cultivation. It is large, of a pyramidal shape, very firm, and of a snow-white colour; it is self-protecting, the heads when fit to cut being nearly covered with leaves	2 6	ADAM'S EARLY WHITE , an excellent Spring kind	1 0
EARLY WHITE CORNISH or PENZANCE , a capital main crop variety, which may be relied upon as the same variety so much grown in Cornwall	1 6	EARLY PURPLE SPROUTING , a very hardy variety, producing a succession of firm purple sprouts of delicious flavour pkt. 3d.	0 8
KNIGHT'S PROTECTING or INVISIBLE , a well-known and excellent kind per pkt. 6d.	1 0	LEE'S WHITE SPROUTING , a hardy variety, with a large compact head, while numerous smaller heads cover the stem per pkt. 6d.	1 6
		PORTSMOUTH or BRIMSTONE , very useful and hardy	0 8
		VANGUARD , an excellent early spring Broccoli, one of the best to give a supply after Christmas	1 6

For Late Use.

COOLING'S BEST OF ALL , a splendid late Broccoli, ready in May, large close compact white heads, and very superior flavour, recommended	per pkt. 6d. and 1/	VEITCH'S MODEL , firm compact pure white beads in May and June, highly recommended	1 6
METHVEN'S JUNE . Fine pure white heads have been cut as late as the end of June. It is very hardy, and stands the Winter well per pkt. 1/	2 6	LATE QUEEN , a very excellent late variety, which produces good heads in May and June. It is quite distinct, of dwarf and compact growth, and is very hardy pkt. 6d.	1 6
		WILCOVE'S LATE WHITE , a well-known and excellent medium late variety per pkt. 3d.	0 8

Cooling's Omega Beet, the best shaped and richest flavoured variety in cultivation.

Borecole or Kale.

CULTIVATION.—Sow in March and May, the former for Autumn use the latter for Spring, in drills lightly covered with fine soil. When the plants are two inches high prick out in beds six inches apart, and when fairly sized remove them again to their final quarters, setting them in rows thirty inches apart each way. A large supply of this useful vegetable should be grown.

From H. S. Brown, Esq., Southsea.—“I am glad to tell you the results I have had from your Seeds are more than satisfactory.”

Cabbage.

CULTIVATION.—To grow good full-headed Cabbage the ground must be richly manured, deeply dug, and thoroughly worked. Sow in rich finely-raked soil which has had a good soaking of water the day before. As soon as the seedlings are well up thin out or prick them off in another bed 6 inches apart. When planted out they should stand about 30 inches asunder. Hoe every week, stirring the ground deeper, and drawing the earth up to the plants when they begin to head. A supply of Cabbage may be had all the year round by successive sowings. The first sowing should be made about the middle of March—this will give the late autumn and winter supply. Further sowings may be made at intervals on to end of July or beginning of August, which will come in for spring and summer use. The Red Pickling should be sown in August.

FINEST WHITE, quart 2s.; per pint 1s. 2d.; per oz. 2d. **CHINESE**, deep green per oz. 4d.

Onion.

CULTIVATION.—To grow onions successfully the ground cannot be too rich; if possible, heavily manure and trench deeply a piece of land specially in the autumn, and leave in ridges during the winter to soften. If large Onions are required early sowing is necessary; the first or second week in February is not too early, but for ordinary crops March is the best month. Sow thinly in drills about a quarter of an inch deep and nine inches apart, keep clear of all weeds by hoeing, and if growing for exhibition thin well and give an occasional watering of liquid manure. To produce small pickling Onions the seed should be sown very thickly and on poor soil. Sow *Tripoli*, and other winter varieties during July and August.

For Spring Sowing.

COOLING'S IMPROVED WHITE SPANISH. This has been grown in our own seed grounds from selected bulbs for several years, and is far superior to that generally sold as <i>White Spanish</i> , being larger in size, more solid, and handsome in shape; we have grown it side by side with <i>Reading</i> , <i>Nuneham Park</i> , and others, and found it far superior, and consider it the most useful Onion in cultivation for general crop 1 6	GIANT ZITTAU , handsome globular shape, fine yellow colour, remains sound until June; very valuable 0 10

Parsnip.

CULTIVATION.—The Parsnip luxuriates in deep rich soil, which should be subsoiled, and the manure applied should be thoroughly decomposed; ground prepared in this manner will always produce long smooth roots. Sow in February in drills drawn eighteen inches apart, and cover with about half-an-inch of fine soil. When the young plants are about 2 to 3 inches high thin out to four inches. They are perfectly hardy, and should be dug up only as required.

Seakale (Seed).

CULTIVATION.—The soil for Seakale must be well trenched and manured. If grown from seed, sow in March and April in drills three feet apart and an inch deep. If roots are planted (which is much preferable) single plants should be placed nine inches apart, in rows three feet from each other. Seakale is easily forced in a warm cellar by putting some of the strongest roots in boxes or pots of soil and covering with litter.

Tomato.

CULTIVATION.—The Tomato is rapidly growing in general estimation, and will probably soon be considered one of the most important of all garden vegetables, as it can be prepared in so many ways for family use throughout the whole year. Sow as required from January to March, and when the plants are about 2 inches high transplant into small pots—one plant to each pot—and set the pots into the hot-bed, by which process the plants are rendered more sturdy and branching. Transfer to the open ground as soon as all danger of frost is over, in hills four feet apart each way, having previously mixed a shovelful of well-rotted manure with the soil. Water freely at time of transplanting, and shelter from the sun for a few days until the plants are established. To hasten the maturity of the first fruits which set, pinch off the tops and all the secondary shoots which afterwards appear above the flowers. Soil should be rich and light on a dry sub-soil.

Selected Mushroom Spawn.

Our Improved Spawn produces large crops of thick fleshy Mushrooms.

CULTIVATION.—In making a Mushroom bed as much fresh horse-manure as will be required to make the bed 12 to 18 inches deep should be thrown into a heap to ferment; turn and mix it well together every three or four days. After it has been turned several times, say for a fortnight or three weeks, it will be fit to make the bed. Beat the manure well down to the depth mentioned above, and allow it to remain a day or two until sufficiently cooled for spawning. When the temperature of the bed is about 65° break the spawn into pieces about the thickness of a walnut, and place it into the bed 2 inches deep and 9 inches apart; cover with 2 inches of good soil, and again beat down. The Mushrooms should appear in about 5 or 6 weeks after spawning. Should the bed get very dry (but on no account otherwise) a slight watering with tepid water is beneficial; when the Mushrooms begin to appear tepid water may be given more frequently. Much disappointment often occurs in growing Mushrooms. To prevent this as much as possible, we have made arrangements for a supply of spawn from one of the best makers in the country; we can especially recommend it as being of the finest quality procurable, and feel convinced that when once tried no other make will afterwards be used.

Fresh English-made Spawn 4d. per brick; bush. 5s. Trial Packet of 3 Bricks free by Parcel Post for 1s. 6d.

FRENCH MUSHROOM SPAWN.—This imported Spawn is gaining favour on account of the excellence of the Mushrooms it produces and its invariable good quality. Many amateurs who fail with the ordinary Spawn succeed with this.—Per box 3/.

We test all our Seeds before sending out—disappointment from defective germination is therefore almost impossible.

Herbs.

CULTIVATION.—A few Pot Herbs should have place in every vegetable garden. Their culture is very simple, and the best way is to make a little seed-bed in the early spring, and set the plants out as soon as large enough in a bed.

Seed Potatoes.

Our Potatoes are grown specially for seed; all the most important varieties in the best districts of Scotland and Lincolnshire; they are very carefully selected, and may be relied upon as true to name and perfectly free from disease. Although we cannot compete with the prices asked for the ordinary market samples, which are sold for eating purposes, and which are too often bought and sent out in a mixed state for planting, yet we believe our prices will compare very favourably with those of other seedsmen who make Potatoes a speciality.

COOLING & SONS' LAWN GRASS SEEDS

As supplied to the Royal Parks.

GRASS SEEDS can never be sown too thickly, as it is found that the thicker the seed is sown the finer will be the turf. March and April are the best months for sowing, and the quantity of seed usually sown is 80 lbs. to 100 lbs. per acre. If the ground is to be clothed thickly the larger quantity is recommended. The land should be rolled before and after sowing the seed. As many kinds of small birds are very fond of Grass Seeds, it may be well to give some protection for a short time till the plants are up. Carefully remove all weeds as soon as they make their appearance, and when the grass has grown a few inches high it should be mown with a scythe, and cut afterwards every ten days till October. A mowing machine should not be used the first season. **Frequent Mowing and Rolling** are necessary to keep the turf in good order, as a thick bottom grass cannot be procured and maintained without compression by frequent rolling.

To improve Old Lawns that are thin, about 20 lbs. per acre of Lawn Seed may be sown, raked in with a fine tooth-rake, and well rolled.

COOLING'S "PHŒNIX" LAWN GRASS.

The Finest Mixture of Dwarf-growing Evergreen Grasses procurable; the best for Garden Lawns and all positions where a dense velvety turf is desired.

COOLING & SONS' "PHŒNIX" LAWN MANURE.

THIS is a specially prepared Manure which should be applied during Spring and early Summer, when it will materially and quickly improve the turf. It is composed only of the most suitable ingredients to encourage the growth of the finer grasses, and will produce a close thick sward of a rich dark green colour. It should be applied in showery weather if possible, at the rate of one pound to every four square yards, or for large lawns at the rate of five cwt. per acre.

NOT INJURIOUS TO ANIMALS OR BIRDS.

DIRECTIONS FOR USE It is necessary to use the Powder on a mild day when the ground is damp, as the worms will then be near the surface. Do not roll for a few days before using or this will prevent the worms from rising. Distribute the Powder evenly over the turf at the rate of about 5 lbs. to ten square yards.

Begonia Roots for Bedding and Pot Culture.

The popularity and adaptability of the Begonia for Bedding purposes has led to its largely increased cultivation. During the summer beds of Begonias withstand the heavy showers and weather far better than Geraniums or Verbenas, and last far longer in flower. We are offering a very beautiful collection of both single and double kinds, in separate shades of colour, at prices really less than the cost of ordinary bedding plants. We strongly recommend their more extended use for out-door culture.

CHOICE HYBRID GLADIOLUS.

For a rich and grand effect during the summer and autumn months, the many and beautiful colours of this splendid tribe of flowering bulbs form one of the most attractive features of the flower garden. They prefer a warm south border, but will grow in almost any situation in ordinary garden soil, which must be deeply dug and slightly enriched with well-decayed manure. The bulbs should be planted from 3 to 4 inches deep, and covered with sand to the depth of an inch, over which place the soil. By planting from February until April a succession of bloom will be produced from July till October.

DIELYTRA.

A beautiful hardy perennial, blooming in the open border from May to June. By forcing they may be had in bloom early in spring, producing in great abundance their pendent heart-shaped flowers.

Spectabilis, extra strong, imported, for forcing, each 6d.; doz. 4s.

From Mrs Selby.—“The plants had from you in the Spring did splendidly throughout the Summer.”

National Telephone—No. 10.

GEO. COOLING & SONS send all VEGETABLE and FLOWER SEEDS Free by Post or Rail. SEED POTATOES, CULINARY ROOTS, MANURES, and GARDEN REQUISITES are sent Carriage Free when the Order, including Seeds, amounts to 20/- and upwards.

Customers will much oblige by giving instructions as to best means of forwarding, name of nearest Station, &c., to ensure prompt delivery.

To obviate the necessity of writing the Seed Order in detail, an Order Sheet is enclosed with this Catalogue, the quantity required of each variety having only to be marked in the column left for that purpose. Care should be taken to always fill in the Name and Address; during the season many orders reach us unsigned, and much inconvenience to customers is caused by our being unable to trace the origin of such orders.

Cheques should be crossed "UNION OF LONDON AND SMITHS' BANK, LTD.," and Postal Notes and Orders made payable to GEO. COOLING & SONS, Bath. May we ask as a favour that orders for very trifling amounts be accompanied by the remittance, the trouble and expense of booking these small sums being great.

We allow a Discount of 5 per cent. off amounts above £1 paid within 14 days' date of Invoice. All Accounts are due without deduction at Midsummer and Christmas. A remittance or reference is respectfully requested from those sending their orders for the first time.

RETURNED EMPTIES.—We charge cost price for Hampers, Bags, &c., but are always willing to allow the full amount charged if they are returned to us in good condition within a month. The name of the sender should always be written upon the address label, and we should be advised by post of their dispatch.

Our NURSERY CATALOGUE, containing Descriptive List of Roses, Fruit Trees, Evergreens, Shrubs, Hardy Climbers, &c., will be forwarded Post Free on application.
